

CASH OR CRASH

Take to the skies for a unique blimp ride and the chance to soar high!

Cash or Crash is an exciting new Live Casino game show that's easy to play, tactical and highly entertaining. There's just one bet and huge potential winnings.

The game features a 20-step, ladder-style payable. The higher you climb, the greater the payouts. For each green ball drawn you climb one step up the ladder, taking you to greater heights and larger cash payouts. If a red ball is drawn you crash and lose your winnings. But draw the gold ball and you get a shield that not only protects you from the next red ball but can also increase the payouts on the payable.

For each drawn green ball, you can decide to Continue, Take Half or Take All. Climb to the top of the payable ladder and you can win up to 18000x – and up to 50,000x if you've drawn the gold ball.

The gold ball also triggers a Bonus Round, where decisions are skipped (since you are shielded from crashing). Just sit back and watch as hopefully more green balls are drawn and accelerate your place upwards on the payable.

Cash or Crash takes you on a unique, immersive journey with the chance to reach thrilling heights and significant riches!

KEY POINTS

- Exciting live game show
- Advanced technology with augmented reality
- Appeals to all player types
- Player makes decisions: Continue, Take Half or Take All.

GAME DESCRIPTION

HIT THE HEIGHTS

The game is set in a blimp that cruises over a bustling metropolis. The main feature in the blimp is the ball drawing machine, filled with lots of green balls, a few red balls, and one gold ball.

As long as a green ball is drawn, the blimp will rise higher and higher, and you will climb the payout table at the same time. After each drawn green ball you're asked if you want to continue the game, take all of your winnings, or take half of your winnings and continue playing the game with the remaining half.

If you draw a red ball this will end the game and cause the blimp to crash.

However, drawing the gold ball gives you a shield and protects you from the next red ball, thus accelerating the journey upwards as long as green balls are drawn!

THE PAYTABLE

Central to the Cash or Crash game is a 20-step, ladder-style payable. The further you progress in the game, the higher you climb up the payable and the greater the payouts. Each green ball takes you up one step.

MAKING YOUR DECISIONS

Each time a green ball is drawn, you make one of the following decisions:

1. CONTINUE

Stay in the game and continue to play with 100% of your potential winnings

2. TAKE HALF

Cash out 50% of your potential winnings and continue to play the game round with the remaining 50%

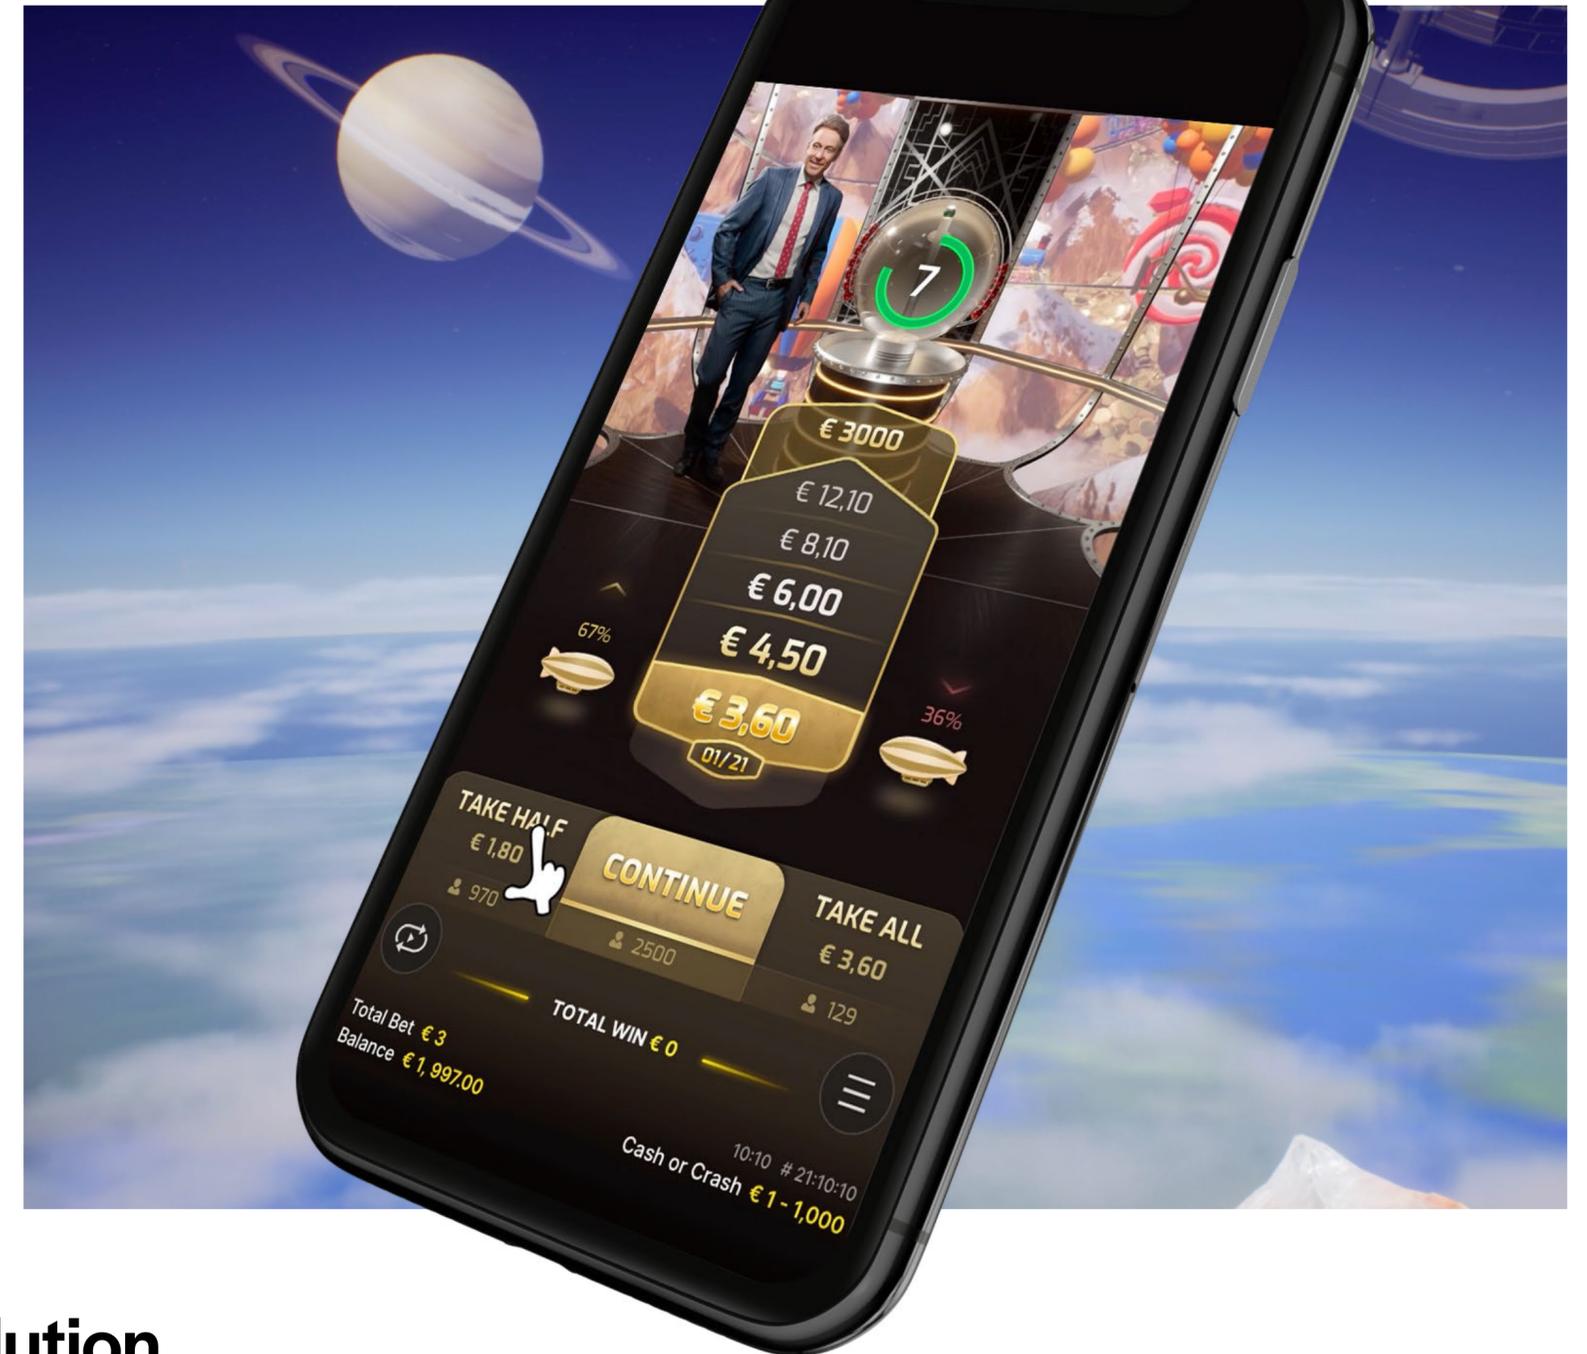

3. TAKE ALL

Cash out all of your winnings and end your participation in this game round. You no longer take part in the game until the next game round begins.

The game ends when a red ball is drawn, unless you have an active shield.

The gold ball gives you a shield, protecting you from a crash when a red ball is drawn. The shield breaks when a red ball is drawn, and after the next green ball, the payouts on the payable are increased.

Cashed-out winnings are paid out at the end of the game round. If you choose TAKE HALF multiple times, your cashed-out winnings are added to your total winnings.

HOW TO PLAY CASH OR CRASH

The objective of the game is to climb as high as possible on the payable without drawing a red ball, which will cause the blimp to crash and end the game round for you. If a gold ball is drawn, this gives you a shield (effectively an extra life) against the next red ball drawn. A drawn gold ball can also increase the payouts on the payable.

1

Place your bet. The payable shows how your payout can increase for each green ball.

2

Wait for the next ball to be drawn.

HOW TO PLAY CASH OR CRASH

3

A green ball is drawn; you decide how to continue: CONTINUE, TAKE HALF or TAKE ALL. If you choose to TAKE ALL, you no longer take part in the game.

4

The game continues until the top of the ladder has been reached or a red ball is drawn. You get your winning notification when the game round ends.
